## Application for Fluorine Mouth Rinsing

To all parents of second ・ third grader's public elementary schools in Iwakura City

Iwakura City Education Committee  
Iwakura City Elementary and Junior High School Principal Association

We have the pleasure to inform you that we .will start carrying out fluorine mouth rinsing for second ・ third graders in elementary schools in Iwakura City. This is based on the "Iwakura Health Plan 21" as we have mentioned in the explanatory meeting. It is said that fluorine mouth rinsing can be affective for later cavity prevention if done during the period when milk teeth are replaced by permanent teeth.

This consists of rinsing your mouth with "fluorine natrium aqueos solution" once a week. Although safety is assumed, we have decided to keep this voluntary and let the parents decide whether to apply for it. Therefore, let us know of your choice by filling out the form below by \_\_\_\_\_.

Please hand this form to your child so that it reaches his/her homeroom teacher. The start of fluorine mouth rinsing ls set for the second school term.
